Counseling the Aging

CG 400 093

Introduction

This information packet, prepared by the ERIC Counseling and Personnel Services Center, is intended to alert the user to a body of literature on a topic of current interest to counselors. It identifies research reports that have been cited in the Educational Resources Information Center's (ERIC) publication, Research in Education (RIE), in Dissertation Abstracts International, and in ERIC's Current Index to Journals in Education (CIJE) from July 1971 through March 1973.

Ordering Instructions

Searchlight has attempted to give availability for all materials listed in this packet. In most cases, it is possible to obtain a personal copy of the title listed. The sources fall into three groupings:

ERIC Documents

References in this search for which an ED (ERIC Document) number is given may be ordered from the ERIC Document Reproduction Service (EDRS). Copies are available in either hard (photo) copy or in microfiche form. The microfiche require a special machine for use. To order any of the ED materials, please refer to the ERIC Reports Order Blank at the back of this packet.

Doctoral Dissertations

All dissertations listed in this search have been drawn from Dissertation Abstracts International, a publication of University Microfilms. They are available on microfilm (MF) at \$4.00 per dissertation, or in bound photo COPY (X) at \$10.00 per dissertation from University Microfilms.

To order, give the following information:

- 1) Order number
- 2) Author's last name and initials
- 3) Type of copy desired (35mm positive microfilms, or soft bound xerographic copy)
- 4) Your name and address (list separately for billing and shipping, if they are different)

Send your order, with payment, to University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Journal Articles

Journal articles are available from the original journal in library or personal collections. Refer to the entry for volume and page designations.

SERVE: Older Volunteers in Community Service.
A New Role and a New Resource.

Community Service Society of New York, N.Y.
Spons. Agency—Administration on Aging (DHEW), Washington, D.C.

Pub Date Sep 71

Note—367p.

EDRS Price MF-\$0.65 HC-\$13.16

Descriptors—Attitudes, Community Agencies (Public), *Community Service Programs, Cultural Enrichment, Demonstration Projects, Health Services, *Human Resources, Interpersonal Relationship, Leadership, Motivation Techniques, *Older Adults, Questionnaires, Recruitment, Resources, *Role Perception, Social Workers, Socioeconomic Status, Surveys, Task Performance, Urban Areas, *Volunteers, Welfare Services

Identifiers—*Project SERVE

This document reports on a demonstration project using older volunteers in community service in one area of a large city. Questions for which answers were sought include: (1) What type of activities might older adults be given that would be both meaningful and useful; (2) What kinds of community agencies would use the services of volunteers most effectively; (3) How can older adults be motivated in the direction of community service; (4) How can those who will benefit from volunteer service be recruited and retained; and (5) What sort of volunteer workers will older persons be? An exploratory survey was conducted to: (1) gather data about the older adult population in the area, (2) determine what opportunities were available for older volunteers in health, welfare, and educational and cultural agencies, and (3) assess the potential for recruiting older adults. Findings include: (1) Older persons are willing and able to volunteer on a regular basis if agency needs are real, if appropriate assignments are available, if transportation is provided, and if staff leadership is present on an ongoing basis; (2) Volunteers of low socio-economic status can be recruited and retained; (3) Persons in their seventies had excellent attendance and a high retention rate; (4) Most volunteers functioned consistently and well; (5) The major reasons for volunteering were need for social contacts and to find a useful and satisfying instrumental role; (6) A program of volunteer service requires step-by-step development over a period of time and grows out of a personal appeal. Career Counseling and Follow-up Study, Spring 1971.

Pacific Heights Adult School, San Francisco, Calif.

Pub Date 71

Note—43p.

EDRS Price MF-\$0.65 HC-\$3.29

Descriptors—*Adult Counseling, Age Differences, *Career Planning, Community Colleges, *Counseling Programs, Followup Studies, *Occupational Guidance, Older Adults, Questionnaires, Sex Differences, Tables (Data), *Vocational Counseling, Young Adults

This follow-up study of participants in the Career Workshop of the Pacific Heights Adult School is based on 117 responses to 453 questionnaires mailed in the Spring of 1971. Responses were analyzed by categories and numerical responses to the questions asked. The categories were: age, education, employment, occupations, occupations and education, years on job, different jobs, student use of other services, and positive and negative statements. Results of the study show: (1) more women than men seek counseling; (2) the Career Workshop is the only counseling available to many adults; (3) there is a movement from job to job by those of high school and college experience, with both seemingly working in the same occupations; (4) the Career Workshop is of great value to adults of all educational levels. Three appendixes contain: A. Statement of the Problem; Questionnaire Schedule; B. Tables of participants' responses; C. Evaluation--Career Workshop 1971. The schedule for the eight meetings of the workshop concludes the report. (DB)

Role, *Ethics, Counseling, Counselors
Ethical practice in counseling should mean more
than remedying past mistakes. Counselors must
give certain philosophical and procedural questions
constant attention to check on the validity
for the present of long held ideas. In this way
emerging issues can be identified before impossible
situations are created. (Author)

Counselor Role

Counselors can injure counselees by prying, by
passing information along, and by using privileged
information as a basis for recommendations to
others. Although counselors are not usually
sympathetic to a legalistic approach, it is from
our constitutional traditions that we can best
deduce the kinds of protection that we need.

Problems, Legal Responsibility, Counselors,
Counselor Functions

Counselors cannot look only to the law to solve
their professional problems in dealing with
information about students. Nevertheless, they
must understand confidentiality, privilege, and
privacy in the context of ethical standards and
legal requirements if they are to meet their
responsibilities to clients, the profession, and to
themselves. (Author)

Doctoral Dissertations

Caramella, Richard Joseph. INCREASING PERCEIVED INTERPERSONAL COMPETENCE WITH NONPROFESSIONALS IN A HELPING ROLE: A PRIMARY PREVENTIVE APPROACH. University of Houston, 1972. Available from University Microfilm, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 72-32.698)

The purpose of this study was to investigate the effectiveness of an interpersonal communications model as a training procedure for non-professionals in a helping role. The theoretical assumptions underlying the training method were based on an interpersonal communications model developed by Ernest Beier. Thirty male dormitory advisors were randomly assigned to an experimental and control group. The experimental group participated in a 12 hour training block, using Beier's model. The 12 hour block was divided into 3 weekly sessions of 4 hours and included: (a) a detailed presentation and discussion of Beier's model, (b) a video taped presentation of various types of communication processes, and (c) various role playing situations concerning typical dorm problems. During the following 2 weeks, the trainees participated in 2 follow up sessions. The control group participated in three weekly leadership training sessions of 4 hours each which included: (a) a discussion of various leadership theories, (b) training experiences which exemplified the different approaches, and (c) a lecture and exercises concerning group decision making processes. Following the three sessions, two weekly follow up sessions were conducted. Upon completion of the training, the advisors were administered the Barrett-Lennard Relationship Inventory Scale (RI) as a self perception instrument. Four weeks later, students rated their advisors using the RI scale and the Role Appropriateness Scale. Results of the t-tests indicated that there were significant differences between the group means as to: (a) the self perceptions of the trainees as measured by the RI scale on the variables of Regard and Congruence, (b) the perceptions of students concerning their advisors as measured by the RI scale on the variable of Empathy, and (c) the perceptions of students concerning their advisors as measured by the Role Appropriateness Scale on the variable of Dormitory Living. The assumption that an understanding of the communication process would enhance the interpersonal competence of nonprofessionals was verified for the variables of Regard, Congruence, and Empathy on the RI scale and for the variable of Dormitory Living on the Role Appropriateness Scale. Certain implications and questions were raised by these results. The apparent inconsistency between the perceptions of the advisors and students may have been due to a more global relationship than that found in therapy. Consequently, the advisors were not able to discriminate between the behaviors involved in Regard, Congruence and Empathy. This suggested that the evaluation instruments used in therapy may not be appropriate for preventive programs. The results concerning the Role Appropriateness Scale indicated the necessity for further research to determine what problems are relevant to the role of dormitory advisors. The purpose of the research would be to determine if perceptions of interpersonal competence are contaminated by role perception. It was recommended that: (1) this study be replicated to test the validity of Beier's model as a training procedure in primary preventive programs; (2) Further research be conducted investigating the development of new evaluation criteria for preventive programs.

Conn, Robert Howard. A STUDY OF ADULT EDUCATION PREFERENCES OF OLDER AGE RESIDENTS IN SELECTED RETIREMENT RESIDENCES IN THE DISTRICT OF COLUMBIA. The George Washington University, 1972. Available from University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 72-19,727)

The purposes of this study were to survey and analyze adult education preferences of older-age residents who live in retirement residences in the District of Columbia, according to age, sex, education, and length of stay in retirement residences, and to survey and analyze the preferences of these residents concerning days, hours, and locations for adult education. A review of the literature included information on academic background of the aged, potential of the aged to take part in adult education, adult education activities of the aged, socioeconomic factors and diseases which affect adult education of the aged, and retirement residences for older-age persons. The following hypotheses were tested: (1) Adult education preferences among the aged who live in retirement residences vary according to sex, age, educational level, and length of stay in a retirement residence, (2) Adult education scheduling preferences for days of the week, hours of the day, and selected locations vary among the aged who live in retirement residences, according to sex, age, educational level, and length of stay in retirement residences. A survey instrument was designed and taken to each of 100 residents, randomly selected, who lived in retirement residences in the District of Columbia. Data were collected, compiled, and analyzed by chi-square. More respondents participate in Hobbies and Recreation than in any other adult education category. Given one choice of adult education, more respondents--regardless of sex, age group, educational level, and length of stay in retirement residence--choose Hobbies and Recreation than any other adult education category. The second largest number of male respondents, female respondents, respondents 75 years of age and older, respondents with high school and college educations, and respondents who have lived in retirement residences three years and longer choose Religious Education. An equal number of respondents with college educations who choose Religious Education also choose Personal Development. The second largest number of respondents 65 to 74 years of age and those with elementary school educations choose Home and Family Life. The second largest number of respondents who have lived in retirement residences less than three years choose the academic category. Given a single choice of the day that is best for adult education, Wednesdays are chosen by more respondents than any other day, regardless of sex, age group, or educational level. Wednesdays are also chosen by the largest number of respondents who have lived in retirement residences less than three years. Mondays are chosen by the largest number of respondents who have lived in retirement residences three years or longer. Additional data on choices made by respondents are presented. Given one choice of the best hour for adult education, more respondents--regardless of age group, educational level, or length of stay in a retirement residence--choose 10 to 11 A.M., followed by 2 to 3 P.M., and 9 to 10 A.M. Female respondents agree with these choices, but male respondents choose hours in this order: 2 to 3 P.M., 10 to 11 A.M., and 9 to 10 A.M. Given one choice of the location that is best for adult education, more respondents--regardless of sex, age group, educational level, or length of stay in a retirement residence--choose the Retirement Residence. The hypotheses were partially supported, but the reader is cautioned that because of the large number of chi-square analyses computed, some of the significant differences may be spurious.

Tanner, Francis Henry. EDUCATIONAL ACTIVITIES OF WYOMING ADULTS AGE SIXTY-FIVE AND OVER. University of Wyoming, 1972. Available from University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 72-32,801)

This study was conducted to provide an overview of the educational activities of Wyoming's senior citizens during the year prior to November, 1971. It was part of a statewide study conducted to determine the status of the elderly in Wyoming in preparation for the 1971 White House Conference on Aging. The overview of participation in adult education was concerned with the type of subjects studied, the method of instruction employed, the sponsoring institution, the amount of time spent in learning situation, and the length of the learning experience. A secondary purpose of the study was to provide a source for comparison with other studies of a similar or related nature. Interviews were conducted with 1042 senior citizens from randomly selected enumeration districts from throughout the state. Of these 1042 individuals, 107 were found to have participated in some form of continuing education during the preceding year. Various personal and socio-economic characteristics were examined as they related to participation in adult education. The variables which were found to be significantly related, at either the .01 or .05 level, to participation were: (1) level of education, (2) labor force status, (3) attendance at meetings of clubs or informal groups, (4) satisfaction with life, (5) income, (6) ownership of home, (7) ownership of car, (8) ownership of stock, bonds, or saving account, and (9) indebtedness. Variables which were not significantly related were: (1) age, (2) sex, (3) subjective view of health compared to age mates, (4) value of major property holdings, and (5) type of dwelling unit. Major findings of the study were: (1) older people participated in religious instruction and hobbies and recreational subjects more often than in other subject areas, (2) community organizations, including churches, were the major sponsoring institutions, (3) the public schools did not provide instruction for any of the elderly in the sample, and (4) the vast majority, 89.7 per cent of older people in the sample did not participate in any form of educational activity during the year studied.

ERIC DOCUMENT REPRODUCTION SERVICE is operated by Leasco Information Products, Inc. for the U.S. Office of Education.

TERMS AND CONDITIONS

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

3. REPRODUCTION

Materials supplied hereunder may only be reproduced for not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

LIPCO will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of LIPCO. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
